

Fire Hydrant Valves

- Available in, Horizontal, Right Angle, Oblique and Bib Nose patterns
- Dual seat type
- For marine and offshore applications
- Inlet: flanged or threaded
- Outlet: instantaneous as standard or any other international fitting

These fire hydrant valves are suitable for both offshore and onshore applications. They are manufactured to BS 5154 and BS 5041 part 1.

The valves are manufactured in corrosion resistant materials with an LG2 gunmetal body and are available with both British Instantaneous Female outlet to BS 336 and a wide range of International outlets.
